

Florida Engineering and Field Services Group, llc.

A Subsidiary of Southeast Contractors Unlimited

“ Exceeding Expectations “

Are you looking for a company that will provide you with more than just a short-term solution?

Florida Engineering & Field Services Group (Florida E & FS Group) collaborates with our clients to provide long-term solutions and partners with you every step of the way. We are Ideally positioned to help you with all of your network design and build needs, our engineers and consultants have the technical knowledge and industry expertise to help you minimize risk, manage technology implementation, and determine the most cost-effective approach to delivering a solid Return on your Investment.

As an engineering, consulting and construction management firm,

Florida Engineering & Field Services Group provides integrated services to the commercial, communications, power, and infrastructure markets from conception to completion.

Florida E & FS Group provides Distribution Engineering Design Services that are part of sag study projects, transmission line rebuilds and re-ratings. These areas of concern include clearance to ground issues, interference by additional structures, crossing lines and other Distribution and Transmission facilities.

Florida E & FS Group resolves Distribution clearance issues through an initial field assessment to provide feasibility of the initial remedy. In addition to a completed engineering design, overall project coordination, including all third party utilities, is provided throughout the construction of the design.

We are a specialized consulting-engineering firm that provides state-of-the-art engineering and design services for telecom carriers, utilities, cable/broadband service providers, municipalities, educational institutions and large private enterprises.

DIGITAL DESIGN AND DEVELOPMENT

MOBILE APP DEVELOPMENT WEB DEVELOPMENT SOFTWARE DEVELOPMENT

3D MODELING WEB MAINTENANCE

We listen, we learn and, most importantly we problem solve.

We work closely with our clients to determine the best trajectory for success. By taking a step by step and thorough approach to each and every project we tackle. We take our strategic planning very seriously as it is critical to get this key component correct so that the rest of the project is a success. We will help you systematically strategize, plan, document and execute your next project.

Our talented web developers work hand-in-hand with our experience team of designers to produce excellent products that not only function exactly as they should, but also look beautiful and maintain high standards of usability. Our websites deliver on all fronts.

Every new website or online system we build is mobile friendly from day one. If you have a mobile application you need built and built correctly then we are your solution. Whether you need IOS or Android, we can help you take your mobile application from dream to reality. Our mobile app developers specialize in mobile first practices and our interface designers implement best practice usability techniques to produce applications that wow consumers.

We have a certified team of drafters, engineers that can provide you with 3D modeling services for any project you may have.

We are able to provide you with 3D modeling services for your visualization or engineering analysis, in order to make your development process more proficient.

Our team of drafters will create 3D geometry of object for your project through the use of efficient software.

We will provide you a accurate and highly marketable 3D Computer-aided Design (CAD) modeling that will satisfy your companies needs.
