

Florida Engineering and Field Services Group, llc.

A Subsidiary of Southeast Contractors Unlimited

“ Exceeding Expectations “

Are you looking for a company that will provide you with more than just a short-term solution?

Florida Engineering & Field Services Group (Florida E & FS Group) collaborates with our clients to provide long-term solutions and partners with you every step of the way. We are Ideally positioned to help you with all of your network design and build needs, our engineers and consultants have the technical knowledge and industry expertise to help you minimize risk, manage technology implementation, and determine the most cost-effective approach to delivering a solid Return on your Investment.

As an engineering, consulting and construction management firm,

Florida Engineering & Field Services Group provides integrated services to the commercial, communications, power, and infrastructure markets from conception to completion.

Florida E & FS Group provides Distribution Engineering Design Services that are part of sag study projects, transmission line rebuilds and re-ratings. These areas of concern include clearance to ground issues, interference by additional structures, crossing lines and other Distribution and Transmission facilities.

We are a specialized consulting-engineering firm that provides state-of-the-art engineering and design services.
